POS tagging   Danish   transfer learning   cross-lingual   cross-domain   social media

We annotate 8,028 tokens with Universal POS tags + three additional layers #UD
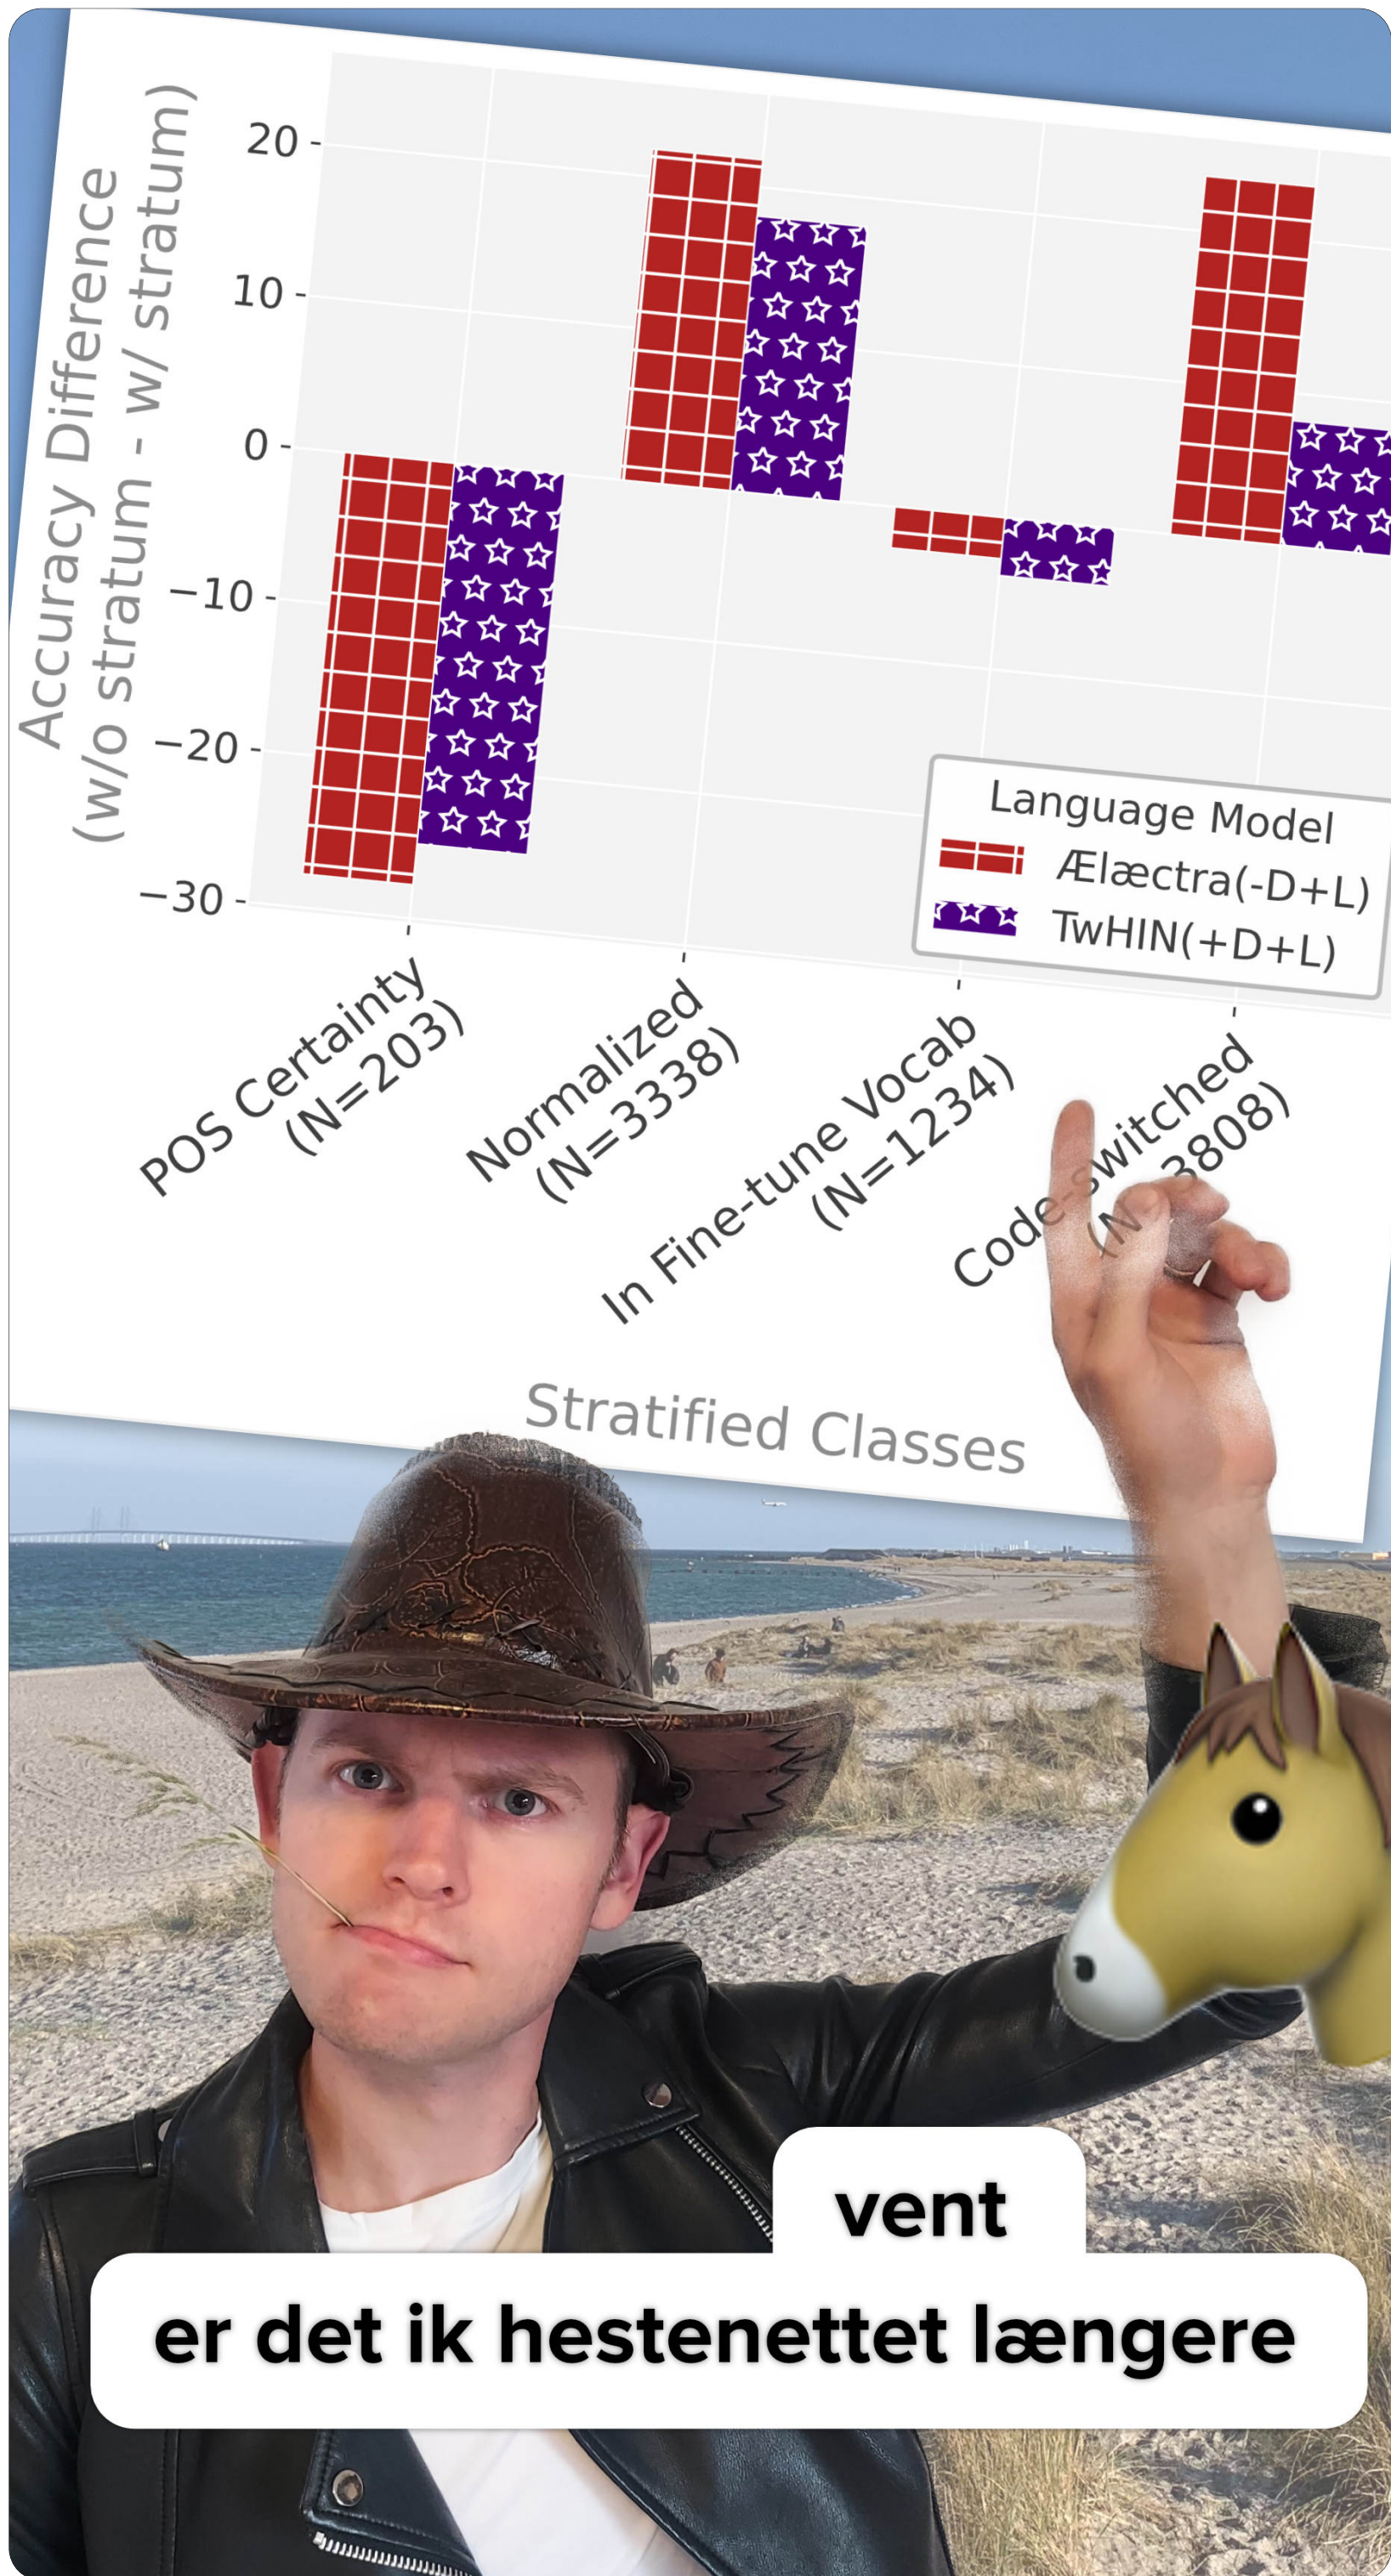

Trine Naja Eriksen

#Code-switched words are exclusively English and are harder to tag for our models

Cathrine Damgaard

#Normalization is important on social media and improves the performance of #POStaggers
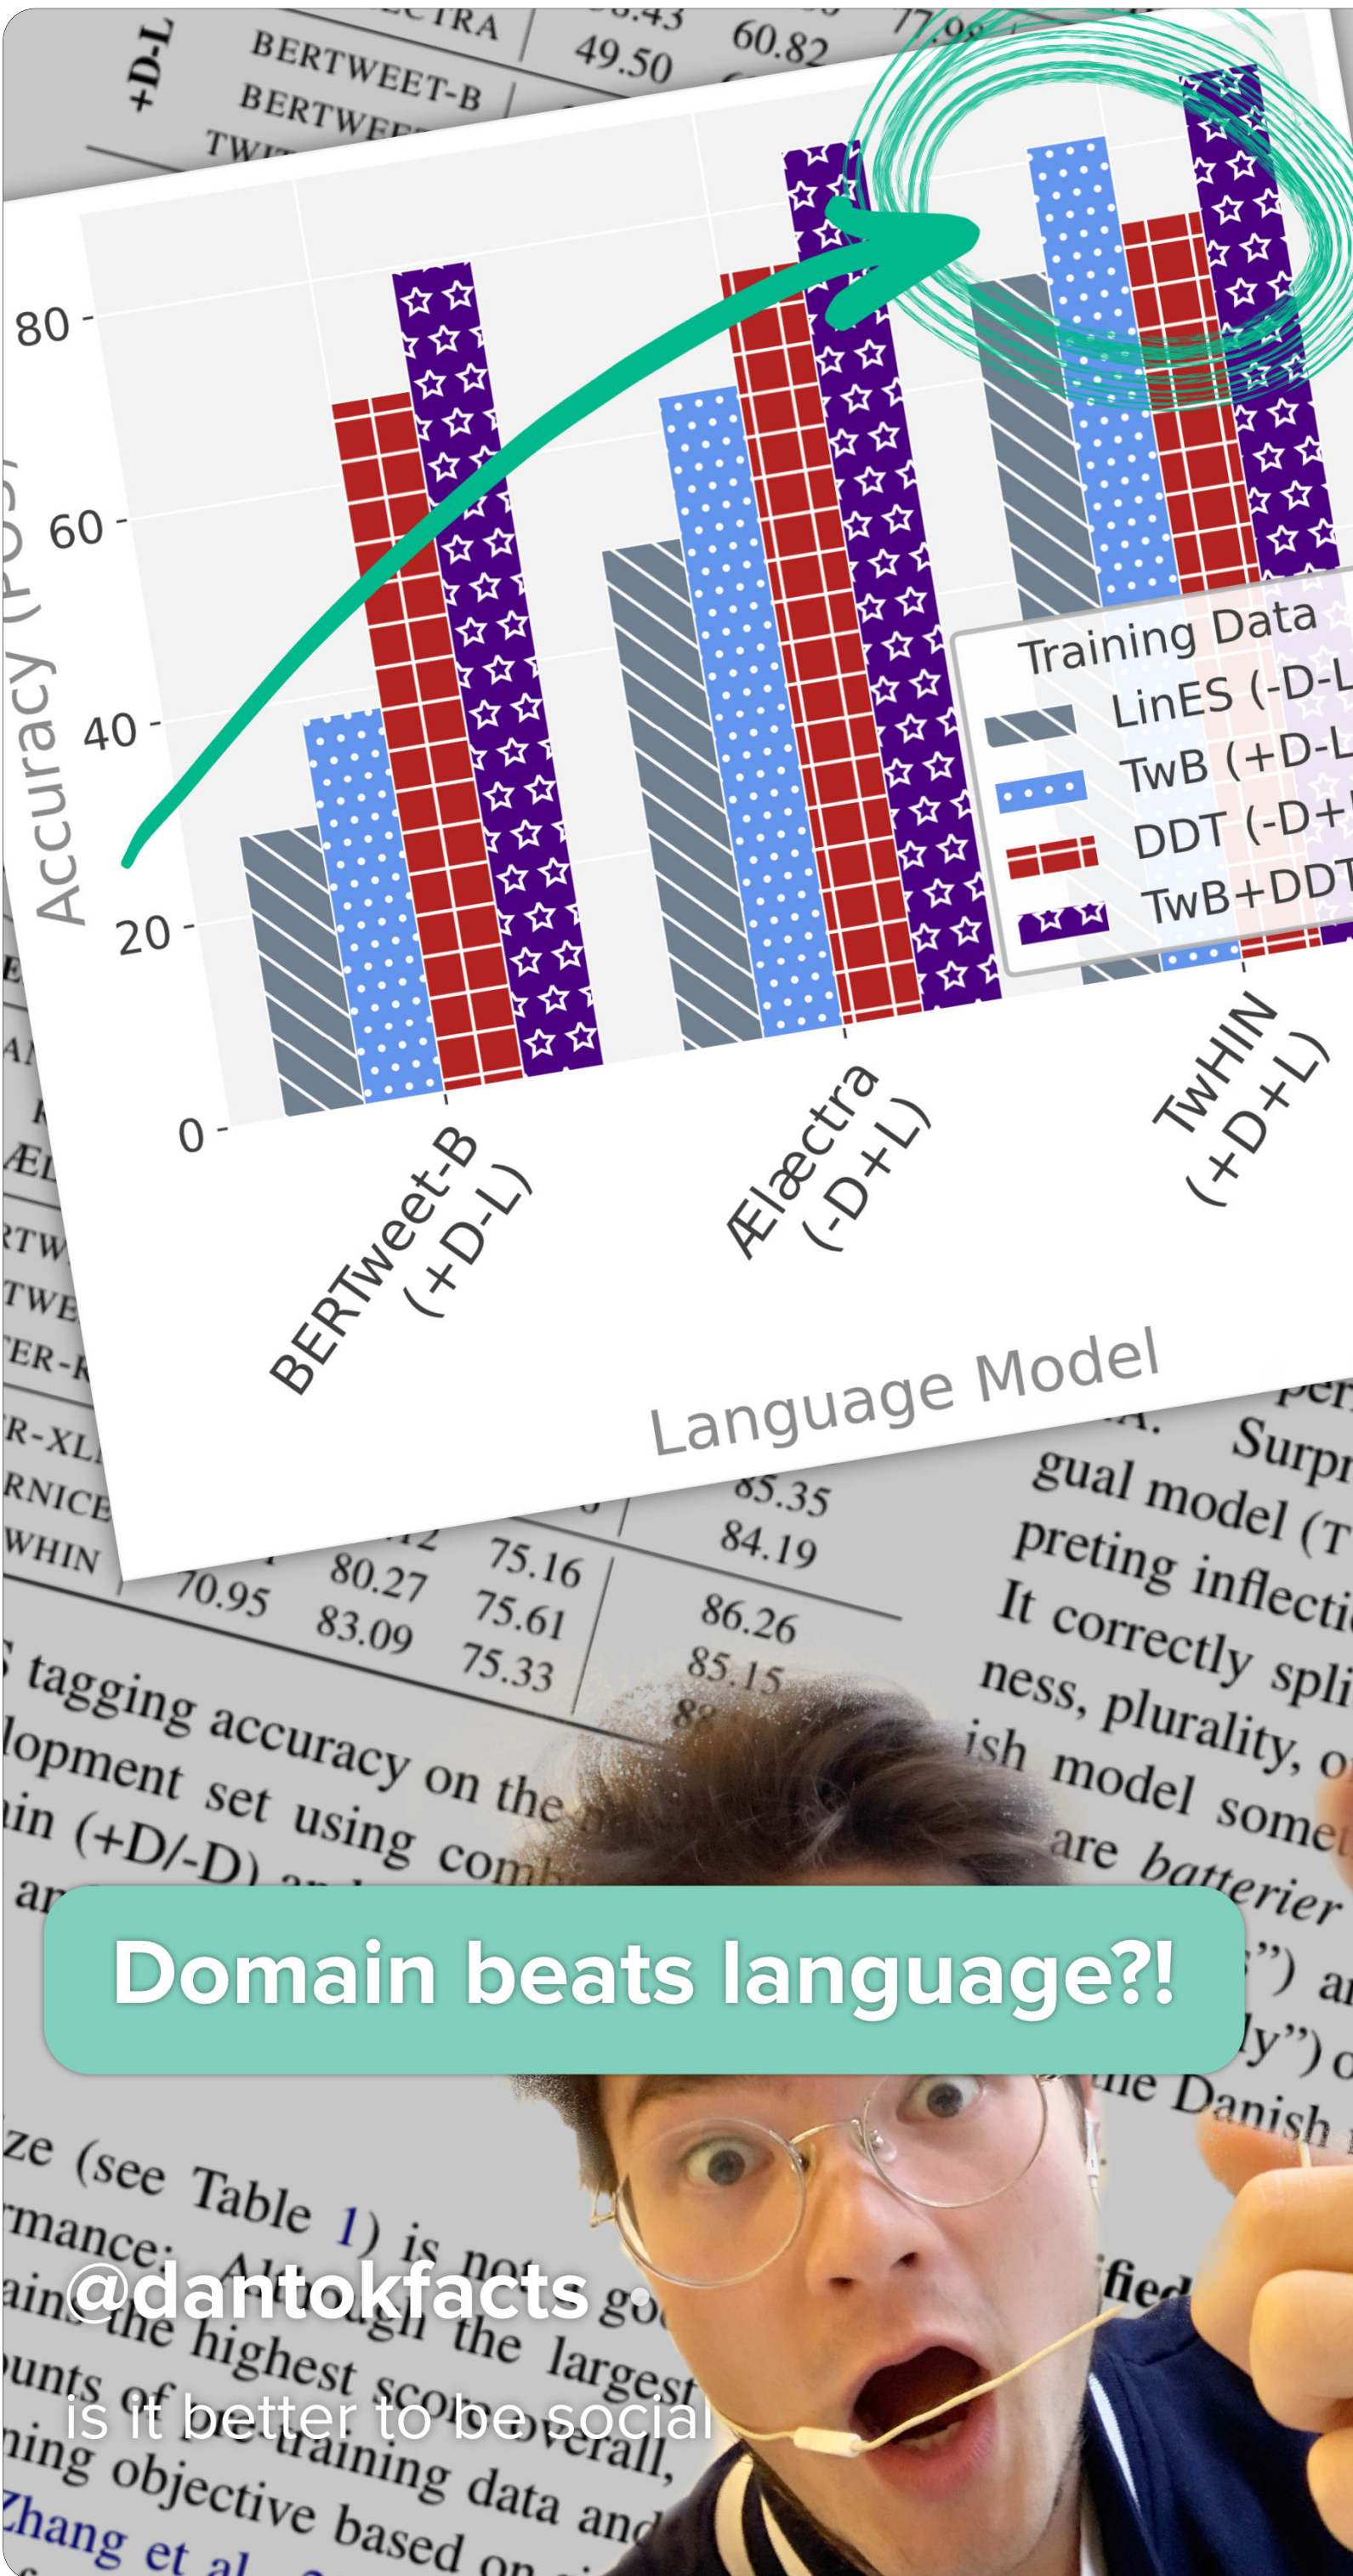

Kia Kirstein Hansen

Our extra annotation layers show which features connect to #syntax on contemporary social media

Rob van der Goot

Words for which annotators were #uncertain also posed the largest problems for automatic taggers

Maria Barrett

#Multilingual models transfer better w/ in-domain, English than out-of-domain, Danish data

Max Müller-Eberstein
